EDUCATION

JSS Academy of Technical Education

Bachelor of Technology in Computer Science and Engineering

Noida, Uttar Pradesh

2023 – Present

United Public School

High School: 93/100

Kanpur, Uttar Pradesh

March 2010 – April 2023

TECHNICAL SKILLS

Languages: Python, TypeScript, C++, Java, C, JavaScript, HTML/CSS

Web Technologies: React, Node.js, Express, MongoDB, Next.js, Tailwind CSS, Mongoose, Socket.IO, JWT, Bcrypt, Vite.js

AI & Agentic Systems: LangChain, LangGraph, Agentic RAG, Qdrant (Vector Search), NeMo Guardrails, Semantic Re-ranking

DevOps & Tools: Git, Docker, CI/CD (GitHub Actions), Vercel, Render, Linux, Postman

PROJECTS

Kubernetes Documentation RAG Assistant | *LangGraph, Qdrant, Gemini, NeMo Guardrails*

2026

- Built an agentic RAG assistant for the Kubernetes documentation website, enabling natural-language question answering over configurations and documentation.
- Implemented LangGraph multi-step reasoning with conversational memory and Qdrant vector search using Gemini embeddings and FlashRank semantic reranking.
- Added NeMo Guardrails to restrict responses to Kubernetes-related queries and protect against prompt injection.
- Developed the documentation ingestion pipeline and evaluated retrieval quality using RAGAS.

Vista ResuAI | *React, Node.js, MongoDB, Google Gemini API, SCSS*

2026

- Engineered an intelligent resume optimization platform utilizing the Google Gemini API to automate detail extraction, suggest impactful action verbs, and correct grammar.
- Implemented a smart document parsing mechanism using Multer for seamless resume uploads and extraction.
- Architected a responsive, dark-mode supported UI with modular SCSS and a secure JWT-based authentication system.

TeamSync (B2B SaaS Platform) | *React, Node.js, MongoDB, TypeScript*

2026

- Engineered a scalable, multi-tenant B2B project management platform with workspace provisioning, epic tracking, and task collaboration.
- Implemented robust authentication leveraging Google OAuth and email credentials, secured by strict cookie-based session management and Role-Based Access Control (RBAC).
- Ensured critical data integrity across complex operations by architecting Mongoose transactions.
- Developed a high-performance analytics dashboard utilizing Vite.js featuring dynamic filtering and cursor-based pagination.

ACHIEVEMENTS & ACADEMIC HIGHLIGHTS

Competitive Programming: Codeforces Pupil (1324), CodeChef 3-Star, LeetCode Knight (1871).

Global Competitions: Meta Hacker Cup: Round 1 Global Rank 4700; Round 2 Global Rank 3100.

Hackathons & Contests: SHASTRA Programming Contest, IIT Madras (Finalist).

Coursework: Data Structures & Algorithms, AI & Machine Learning, Operating Systems, Software Engineering, Database Management Systems, Object-Oriented Programming.
